

Informations on private ancestry assessments

Prerequisite

Documented declaration of consent of all legal representatives of the child.

Duration

The results of the assessment will be sent to the adult persons tested after a maximum of 10 working days by post in a discreet envelope.

Alternatively, a pick-up is possible at our institute. Prerequisite is the receipt of payment.

Sampling

Samples are taken painlessly from oral mucosa swabs.

A blood sample is not necessary for this purpose.

In addition to the child the mother and the putative father(s) are always tested.

Security

In the case of examinations of mother, child and possible father, the legal requirement of at least 99.9 percent for "practical proof of paternity" is guaranteed by the analysis of 15 characteristic systems.

Private ancestry assessments (paternity assessments) are reported by us with full probative value in accordance with the guidelines of the Genetic Diagnostics Commission for the reimbursement of ancestry assessments.

They meet all requirements to be recognized as evidence in court (ability to recognize). Ultimately, however, only the court decides on the approval of an assessment.

Appointment and procedure

Contact by telephone and short-term appointment possible.

Samples are taken at our institute in Kaiserslautern. Samples can also be taken by your family doctor or paediatrician after consultation with us.

In this case the additional costs for taking the samples must be taken into account.

Costs

Mother + child + putative father: 416,50 € (incl. VAT)

Each additional person: 178,50 € (incl. VAT)

Studies on other family constellations on request.

Language

On request, the report can also be prepared in English (no additional costs).
